

Let the itelligence spirit infect you!

as Junior Database Administrator SAP HANA (f/m/d)

- from our SAP expertise, which is contagious.

for our location Dresden

That is what makes the itelligence virus special:

- **Team-oriented corporate culture** and communication at eye level with a high exchange of knowledge
- **Trust Working Time, Mobile Work and Home Office Option**
- **Individually coordinated induction** training including sponsorship program
- **In-house training academy** with a wide range of specialist and soft skills training courses
- **25% employer's allowance for occupational pension provision** and other attractive pension offers

Contagiously good! Performers and pioneers in the IT field watch out!

Join us as a pioneer in the Managed Cloud environment and let the itelligence spirit inspire you! As part of the NTT DATA Group, we specialize in value-added SAP solutions for our global customers.

Do you want to take the first step in your career and be part of our highly qualified team of more than 8,000 specialists in 25 countries? Then plan and operate globally distributed cloud landscapes for our customers in the infrastructure or database area!

Do you love challenges?

- You will be responsible for **message processing, technical incident management, problem management and root cause analysis.**
- You are responsible for **change management.**
- You are responsible for **installation, patching and upgrades.**
- You ensure the **high availability of the systems including disaster recovery setup.**
- You are responsible for **performance monitoring, tuning, backup, restore and recovery.**
- **Technical projects** (improvement of product and process) complete your job.

Convince us with your potential!

- You have a **degree (e.g. business informatics, computer science) or IT training** or are a career changer with IT affinity and experience.
- You have **first knowledge in database administration and architecture**, ideally SAP HANA, SAP ASE or comparable systems.
- Ideally, you should have **some experience in debugging and analyzing database problems.**
- You have **knowledge in programming (e.g. SQL, Python) and Linux.**
- You have **fluent English skills**, knowledge of German is an advantage
- **Weekend and on-call duty** are not a challenge for you?
- You are characterized by **analytical skills, technical affinity and a strong solution orientation.**
