

Junior software engineer

PEER Group GmbH

Smart manufacturing starts with factory automation software

PEER Group is the largest supplier of factory automation software for Smart Manufacturing and Industry 4.0 in semiconductor and related industries.

We provide innovative software solutions and consulting services to semiconductor, photovoltaic, pharmaceutical, and other high-tech industries. In addition, we help lower the cost of automation for our customers by solving their most challenging equipment automation, data management, and custom application development problems.

PEER Group's European branch, PEER Group GmbH, is located in Dresden, Germany and focuses on Equipment Automation Framework (EAF) based equipment integration and Automation Capabilities Management (ACM) consulting services.

Junior software engineer

Based in Dresden or Regensburg, Germany and Villach, Austria

You are skilled in C# programming – with a solid understanding of the Microsoft.NET framework. You are interested in software engineering in industrial applications in the field of equipment automation, process control and/or production control. You like to travel and work abroad, and you enjoy working with international multicultural teams. Accordingly, you have good oral and written communication skills in English and German.

If you feel comfortable that you satisfy the following requirements we would be happy to receive your letter of application.

- Practical application of object-oriented analyses and design with Unified Modeling Language (UML) required
- Solid understanding of the C# programming language and the Microsoft .NET framework (at least one of WPF, WCF, WF, etc.)
- Experience with databases (Oracle, MS SQL Server, MySQL) required
- Programming language C++ desirable
- Practical knowledge about equipment integration standards desirable

Successful candidates will be responsible for:

- Programming of customized and standard software components at the server-level or the graphical user interface level within our customer solutions or PEER Group products
- Implementation of automated test procedures
- Close interaction with our senior software engineers
- Sole responsible programming activities at our customers.

About PEER Group

PEER Group is headquartered in Kitchener-Waterloo, Ontario, Canada, with an office in Dresden, Germany. A privately-held company, PEER Group currently employs over 195 people worldwide.

We are an equal opportunity employer. Employment decisions are made on the basis of qualifications, ability and performance. We welcome inquiries from everyone and value diversity in our workplace. If you require accommodation in completing the application process please email recruit@peergroup.com or call HR at 49-351-2139000. If you are contacted regarding this position, please advise HR of accommodation measures you may require during our interview process. Of course, we will address these matters with respect and confidentiality.
